

Dear Patient and Friend:

Please note our current protocol below, keeping in mind your safety for a beautiful result from your filler appointment.

Juvederm/Dermal Filler injections

4 weeks prior to your appointment:

- No vaccines (example: Flu, Shingles, Covid, Pneumonia)

2 weeks prior to your appointment:

- No dental work (even cleaning) to avoid possible granuloma “hard knots”

1 week prior to your appointment:

- Avoid Advil, Ibuprofen, aspirin (all NSAIDS and blood thinners to reduce bruising)

1 day prior to your appointment:

- Avoid alcoholic beverages (especially wine)
- No workout (this increases possible bruising due to vasodilation)
- No makeup

Post-Treatment:

- No vaccine or dental work 2-4 weeks after treatment
- No makeup 24 hours post treatment
- No workout 24 hours post treatment

There are no contraindications with Botox® Cosmetic injections regarding vaccinations, so there is no delay required for your Botox® Cosmetic treatment.

Our practice does not require that you have a COVID 19 vaccination to receive treatment.

If you have any questions, please call our office 704 375 7111.

Thank you for entrusting us with your aesthetic needs.
